NJAWI MEETING NOTICE

President: George Reitz
Vice President: Antony Jakubowski
Treasurer: John Gehman
Secretary: Daniel Smith

Wood Cad & Cam drawing and process software presentation

Bill Watters had a small shop in Paterson for nine years. He sold the business and went into software sales and consulting. His software sales experience was three years with Cabinet Vision then he has spent the last nine years doing sales and consulting with RSA Solutions.

Now RSA Solutions has broadened our technologies outside of the woodworking industry by offering the strongest "Job Shop" ERP or manufacturing management and design software available.

There are many choices when it comes to software solutions for your business, but we have your company covered. With over 100 years of combined knowledge in manufacturing, RSA Solutions can provide the best choices in technology that will allow your business to grow and become more profitable!

Crows Nest Project Management software presentation

Norm Fink is president and founder of NPF Consultants, a software sales and consulting firm that is solely focused on providing best in class Project Management and ERP functionality based on Crows Nest Software. Norm has been intimately involved in custom woodwork project based manufacturing his entire life. In 1980, Norm and his brother founded Keytrix Systems, and introduced the architectural woodworking subcontractor industry's first software solution specifically developed to accommodate complex project based estimating, material and labor forecasting, cut listing and shop drawing submittal assistance. Upon the sale of Keytrix Systems in 1996, Norm remained active in executive sales management positions with various software companies, until the formation of NPF Consultants.

Today, NPF Consultants exclusively represents Crows Nest software on a global basis, which empowers companies to manage and monitor projects by deploying a cohesive platform solution enabling critical PROJECT MANAGEMENT and ERP functionality.

New OSHA guidelines for millwork companies

Mr. Thomas Paterson is a Certified Safety Professional (CSP). He has a Bachelor of Science Degree in Safety Management from Indiana University of Pennsylvania. His 36 years of safety and health experience includes heavy construction, Electrical Utility (Generation, Transmission and Distribution), and manufacturing at the corporate and field level. Founded in 1996, Tom is the president of Professional Safety and Health, Inc. a firm offering diverse services in consulting, training and industrial hygiene to General Industry, Construction Industries and MSHA sites. He has been a PA OSHA Consultant at Indiana University of Pennsylvania (IUP) for 2 years. Relevant hands-on work experience includes welder, pipefitter, instrument fitter, sheet metal mechanic, coppersmith, heating, air condition and refrigeration.

In addition, before becoming a consultant, Tom was also employed in the shipyards, by a major airline in many different capacities, Bechtel Power Corporation and Pennsylvania Electric Company.
